UNIVERSITE BORDEAUX SEGALEN.

The general research topic of Dr Olivier Augereau is about document image analysis (computer science). More precisely, he works on document image recognition and retrieval. Olivier adapted image object recognition to complex document images. His PhD work has been awarded in one french conference (CIFED2012) and one international conference (DRR2013). His work is now used in several companies for non-exact image retrieval process.

During 2012, Olivier spent 1 month in the OPU laboratory (Osaka Prefecture University) with Pr Koichi Kise. This short term period resulted in a very interesting exchange.

Olivier Augereau has the skills and qualities of an excellent researcher. I enthusiastically recommend Olivier Augereau.
